PROFILE

Final-year IT student specialising in Software Development, with hands-on experience building C# / .NET applications, including ASP.NET Core Web APIs and MVC web apps backed by SQL Server and deployed to Azure. Also experienced with Java, PHP / MySQL and Kotlin. Team Leader on a client-facing Work-Integrated Learning project. Former Capitec Bank consultant, bringing experience in high-pressure, customer-facing environments. Eager to contribute to a development team and keep learning from experienced engineers.

EDUCATION

Diploma in Information Technology – Software Development | Rosebank College *2024 – Present*

- Specialisation in Software Development with coursework spanning programming, OOP, database systems, and software engineering principles.
- Relevant modules: Object-Oriented Programming (Java), Database Systems, Software Development Principles, Systems Analysis & Design.

TECHNICAL SKILLS

Languages: C#, Java, SQL, PHP, Kotlin, HTML, CSS, JavaScript (basic)

Frameworks: .NET / ASP.NET Core (MVC, Web API), Entity Framework Core, ASP.NET Identity, Android

Databases: SQL Server, MySQL, Azure SQL Database, SQLite

Cloud & DevOps: Azure App Service, Azure DevOps, Git / GitHub, GitHub Actions (CI)

Testing: Unit testing

Concepts: Object-Oriented Programming, REST API design, Data Structures, Database Design, Agile / SDLC, Systems Analysis

Tools: Visual Studio, VS Code, IntelliJ IDEA, Android Studio

Soft Skills: Communication, Teamwork, Team Leadership, Problem Solving

PROJECTS

RaceDay API | C# / .NET 10 / ASP.NET Core Web API / EF Core / SQL Server

- Built a RESTful ASP.NET Core Web API for managing race events, categories, enrolments and results, using Entity Framework Core (code-first) with SQL Server.
- Implemented role-based session authentication (Organiser and Participant roles) and documented the endpoints with Swagger.
- Wrote 26 unit tests and set up a GitHub Actions CI/CD pipeline to build and test the project automatically on every push.
- Used Git and GitHub throughout, working on a feature branch with regular commits.

Gift of the Givers Web Application | C# / ASP.NET Core MVC / Azure

- Group project building a web platform for the Gift of the Givers Foundation, a South African disaster relief organisation.
- Responsible for the responsive Bootstrap layout, authentication and roles (ASP.NET Identity), and the donation features (one-time and recurring donations with a placeholder tax certificate).
- Team deliverables included an Azure Boards project plan, an Azure SQL Database schema and ERD, and a prototype deployed to Azure App Services.

Vehicle Service & Online Booking System – ZAS Petroleum | PHP / MySQL / Kotlin / Azure

- Team Leader of a four-person group on a Work-Integrated Learning project, delivering a web-based vehicle service and online booking system for client ZAS Petroleum.
- Built the web application with PHP and MySQL, including database design (ERDs and SQL schemas), and deployed it to Microsoft Azure.
- Developed an Android app in Kotlin with user authentication, vehicle service booking, booking history and announcements, using SharedPreferences and the Navigation Component.
- Produced team documentation, including a 17-slide presentation covering both project tasks.

Cybersecurity Awareness Chatbot | C# / WPF / XAML

- Developed a desktop chatbot with an interactive graphical interface, offering security tips, password guidance, phishing information and task reminders.
- Applied object-oriented and event-driven programming principles to build a user-friendly application.

Java Messaging Application | Java / JSON

- Designed and built a full messaging application in Java, applying encapsulation, inheritance, and modular class design.
- Implemented message storage and retrieval using JSON for persistent data, plus search and delete functionality with a clean separation of concerns.

Budget Tracker Mobile Application | Kotlin / Android Studio / SQLite

- Designed and developed an Android app for managing personal expenses, with spending categories, budgeting goals, and graphical spending reports.
- Used SQLite for local data storage and managed the project with Git and GitHub.

TV Series Management System | Java

- Built a console-based system for managing television series records, with full CRUD functionality and input validation.
- Used reusable methods and modular classes to keep the code organised and maintainable.

Masinqobe Foundation Website | HTML / CSS / JavaScript

- Designed and developed a responsive website for a non-profit organisation, focusing on accessibility, clean layouts and intuitive navigation.

WORK EXPERIENCE

Banking Consultant | Capitec Bank *2023 – 2024*

- Delivered customer-facing support in a high-volume, compliance-regulated banking environment.
- Analysed client financial information to resolve queries accurately and efficiently under time pressure.
- Followed compliance procedures and maintained accuracy when handling sensitive customer information.
