

# Sinoxolo Mkosi

Software Development Intern Candidate · Java · OOP · Final Year IT Student

Cape Town, Western Cape · [Sinoxolo.mkosi09@gmail.com](mailto:Sinoxolo.mkosi09@gmail.com) · 076 050 5113 · [linkedin.com/in/sinoxolo-mkosi-15194a29a](https://www.linkedin.com/in/sinoxolo-mkosi-15194a29a)

## PROFILE

---

Final-year IT student specialising in Software Development with a strong foundation in Java, object-oriented programming, and database systems. Proven ability to translate academic concepts into working software through personal and coursework projects. Former Capitec Bank consultant, bringing real-world experience in high-pressure, customer-facing environments reinforcing communication, analytical thinking, and attention to detail. Eager to contribute to a development team, learn from experienced engineers, and build scalable solutions.

## EDUCATION

---

**Diploma in Information Technology – Software Development** | [Rosebank College](#) 2024 – Present

- Specialisation in Software Development with coursework spanning programming, OOP, database systems, and software engineering principles.
- Maintaining the 65%+ module average required for this internship application.
- Relevant modules: Object-Oriented Programming (Java), Database Systems, Software Development Principles, Systems Analysis & Design.

## TECHNICAL SKILLS

---

**Languages:** Java (primary), SQL

**Paradigms:** Object-Oriented Programming, Procedural Programming

**Concepts:** Data Structures, Database Design, Systems Analysis, Software Development Life Cycle (SDLC)

**Tools:** Git / Version Control, IDE environments (IntelliJ / Eclipse)

**Soft Skills:** Communication, Teamwork, Problem Solving, Analytical Thinking, Time Management

## PROJECTS

---

### Java Messaging Application

- Designed and built a full messaging application in Java, applying core OOP principles including encapsulation, inheritance, and modular class design.
- Implemented message storage and retrieval using JSON for persistent data handling, demonstrating practical understanding of data serialisation beyond basic file I/O.
- Built search and delete functionality, requiring logical data traversal and clean separation of concerns across components.
- End-to-end project ownership from design to a working, testable application directly aligned with real-world software development workflows.

### Cybersecurity Awareness Chatbot (C# / WPF / XAML)

- Developed a desktop chatbot application using C# and WPF with an interactive graphical user interface.
- Implemented cybersecurity awareness features, including security tips, password guidance, phishing detection information, and task reminders.

- Applied object-oriented programming principles and event-driven programming to create a user-friendly application.
- Integrated data storage and user interaction features to improve usability and functionality.

### Budget Tracker Mobile Application (Kotlin / Android Studio / SQLite)

- Designed and developed an Android application to help users manage personal expenses and budgets.
- Implemented expense tracking, spending categories, budgeting goals, and graphical spending reports.
- Used SQLite for local data storage and applied Android development best practices for responsive user interfaces.
- Managed the project using Git and GitHub for version control.

### TV Series Management System (Java)

- Developed a console-based management system for maintaining television series records.
- Implemented CRUD (Create, Read, Update and Delete) functionality with input validation.
- Applied object-oriented programming concepts to improve code organisation and maintainability.
- Created reusable methods and modular classes to support efficient application functionality.

### Masingobe Foundation Website (HTML, CSS, JavaScript)

- Designed and developed a responsive website for a non-profit organisation.
- Built user-friendly web pages using HTML, CSS, and JavaScript.
- Applied responsive web design principles to ensure compatibility across desktop and mobile devices.
- Focused on accessibility, clean layouts, and intuitive navigation.

### Budget Tracker Mobile Application (Kotlin / Android Studio / SQLite)

- Designed and developed an Android application to help users manage personal expenses and budgets.
- Implemented expense tracking, spending categories, budgeting goals, and graphical spending reports.
- Used SQLite for local data storage and applied Android development best practices for responsive user interfaces.
- Managed the project using Git and GitHub for version control.

## WORK EXPERIENCE

---

### Banking Consultant | Capitec Bank

2023 – 2024

- Delivered customer-facing support in a high-volume, compliance-regulated banking environment.
- Analysed client financial information to resolve queries accurately and efficiently under time pressure.

- Developed strong interpersonal, communication, and problem-solving skills directly transferable to collaborative development teams.
- Demonstrated reliability, attention to detail, and accountability — core traits for engineering roles.

## WHY THIS ROLE

---

I am applying for this role because it directly aligns with my studies, my Java experience, and my goal of growing as a software developer inside a professional engineering team. I bring academic rigour, a customer-first mindset from my banking background, and genuine enthusiasm for writing clean, well-structured code. I am ready to learn fast, contribute meaningfully, and grow into an engineer who builds things that matter.
